

Dear Joe Brown,

REF: *Change in School Demographics year to year , Request Number: 4989*

Thank you for submitting your request. Please note that I have posted a draft file of the request and have made the following assumptions. To ensure that I have fully understood your request please confirm if my assumptions are correct. May you also respond to the questions below so that I can provide you with the exact data that you are looking for?

**Assumptions:**

**Assumption 1: Confirm that the target schools requested are as follows**

AITON  
AMIDON-BOWEN  
COOKE HD ES  
DREW  
GARFIELD  
GARRISON  
HARRIS CW  
HENDLEY  
JANNEY  
KIMBALL  
LECKIE  
MINER

**Assumption 2: The 2009 and 2010 data does not have matching race fields**

The 2010 data has additional race fields namely, Multi-Racial, Native Hawaiian/Other Pacific. The assumption is that these races were not yet being recorded in 2009 and may have been assigned to different races. About 85 students have a different race assigned to them than the one they had in 2009, these numbers are highlighted in the race audit sheet. I will proceed to use the assumption that the 2010 race/ethnicity recorded per each student is the most up to date race.

**Assumption 3: Please confirm if the below suggested deliverables meet your request?**

1. Sheet 1: 2009 Audited enrollment counts by race/ethnicity count and percentage
2. Sheet 2: 2010 Audited enrollment counts by race/ethnicity count and percentage
3. Sheet 3: Percentage change in enrollment and demography by race/ethnicity
4. Sheet 4: Count of New Students, Same Students and Turnover students for each school from 2009 to 2010.

May you please confirm if these assumptions are correct and add any information or deliverables that I may have missed. Once confirmed, I will be sending you the formatted excel file with the requested data.

Best Regards

Anesu
